

# Scott May

UX Engineer

(502) 648-0610  
smay44@gmail.com

## EXPERIENCE

### UX Engineer, UK HealthCare

JULY 2020 - PRESENT

Led design and implementation of design system and component library, driving consistency and more human-centered design across products. Architected and developed modern SPAs using React and TypeScript, established best practices through code reviews and mentorships. Engaged with customers to gather requirements, translating them into user stories and prioritizing issues in product backlogs.

### Drupal Developer, University of Kentucky

SEPTEMBER 2019 - JULY 2020

Managed the college's marketing website. Designed and developed user-centered Drupal themes enabling faculty and students to effectively showcase their research and organizations.

### Interaction Designer, University of Kentucky

MARCH 2017 - AUGUST 2019

Created interactive touchscreen applications for wayfinding and student recruitment, focusing on intuitive user interaction. Managed multiple Drupal sites while improving content management workflows. Developed JavaScript applications using React and Node.js.

### Frontend Developer, Suran Systems

AUGUST 2015 - MARCH 2017

Designed and developed frontend interfaces for member management, giving, and payroll solutions focused on user-friendly nonprofit workflows.

## SKILLS

### User Experience
